6 Head Fully Automatic

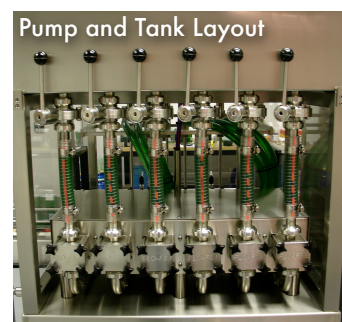

## Fast and Flexible Automatic Filling Machinery 2 To 10 Filling Heads

The Flo-Fill Filling Machine is an expandable automatic in line liquid filler that is controlled by the latest Servo, PLC and Touch Screen Technology, resulting in a high speed, highly accurate machine with quick change overs and washouts and a simple operator interface that stores all machine settings.

The Filler can be used on a wide range of low to high viscosity liquids filled into containers of various shapes and sizes from 10ml to 5lt.

The machine is supplied with a built in header tank, level control system and a six metre variable speed conveyor.

Pump and Tank Layout

Various filling methods including "Diving" and "In To Neck" can be used with a range of different sizes and styles of changeable positive shut off nozzles. Multiple pumping and nozzle movement speeds are available giving flexibility of control with problem products.
