Single Head Bench-Top

## Fast and Flexible Bench-Top Filling Machinery

The Flo-Fill Bench-Top Filling Machine is controlled by the latest Servo, PLC and Operator Terminal Technology, resulting in a fast and highly accurate machine with quick change overs and washouts and a simple operator interface that stores all machine settings.

The Filler can be used on a wide range of low to high viscosity liquids filled into containers of various shapes and sizes from 10ml to 5 lt. Various filling methods including "Bottom Up" and "In To Neck" can be used with a range of different sizes and styles of changeable, positive shut off nozzles. Multiple pumping speeds are available giving flexibility of control with problem products.
